

How to tie a perfect bow

HOW TO TIE A BOW 1. Wrap the ribbon around the box (as shown). 2. Tie a knot and cut the ribbon leaving 6-inch tails. 3. Using two colors of ribbon, form a loop with the ribbon (use half the width of the box to estimate size of loop). 4. Continue to form loops, pinching in the middle, until four loops are formed on each side (you may have more loops if you are using only one strand of ribbon). 5. Still holding the pinched center, position the bow on the box knot, and tie the bow onto the package with the ribbon tails. 6. Gently pull to separate and plump loops. 7. Trim the ribbon ends on the diagonal. 8. Punch a hole in the corner of the gift card and thread the card onto a ribbon tail.
