

How to wrap a perfect gift

FOLLOW THESE STEPS 1. Pleat two sheets of tissue paper to fit the dimensions of the box you'll be using. Center one tissue north-south, another east-west, and push them down into the box, leaving tissue hanging over the edge on all four sides. Put the gift in the box. Fold the tissue paper edges over the gift. 2. Measure the wrapping paper against the box (trim the sides of the paper to about three-quarters of the depth of the box) and cut. 3. Put the top on the box, turn it upside down and place in center of gift wrap. Fold the paper halfway around the box and tape. 4. Fold under the other raw edge about 1/2 inch. 5. Affix double-sided tape to the folded edge. 6. Fold the corners as shown and affix with double-sided tape. 7. Repeat the corner folds on the other end of the box.
